Leverage NSA Technology, Gain Market Advantage

The NSA Technology Transfer Program (TTP) provides access to the Agency's cutting edge technologies through a Patent License Agreement (PLA). With **over 200 innovative technologies** available for license, the TTP may have exactly what your company needs to gain a competitive edge in the commercial marketplace.

8 Steps to Licensing an NSA Patent

1. DISCOVER | *Browse the NSA Technology Catalog*

The NSA Technology Catalog provides a complete listing of the patented NSA technologies available for license.

2. IMAGINE | *Grow your company with our technologies*

Does one of our technologies interest you? Imagine adding this technology to your existing capability. Imagine building a business around this technology.

3. CONNECT | *Contact the NSA TTP*

Do you have an idea that involves using an NSA technology? Time to contact the NSA TTP to move from idea to innovation!

4. ENGAGE | *Talk with our inventors*

Access the intellect behind NSA's inventions. Formal documentation confirms intentions and provides the foundation for engagement.

5. PITCH | *Provide your plan for our technology*

Did discussions with the inventor convince you that your idea is solid? A business plan outlines your technical, business, marketing, and economic strategy.

6. DECIDE | *Negotiate licensing agreement terms*

Your business plan is accepted. Negotiate and sign a PLA.

7. ACQUIRE | *Put NSA technology to work for you*

See your idea come to life!

8. CREATE | *New products, new business, new jobs*

Move NSA technology from the lab to the commercial marketplace. Strengthen the economy by creating new products, new business, and new jobs!
